Where To Spend... US By County

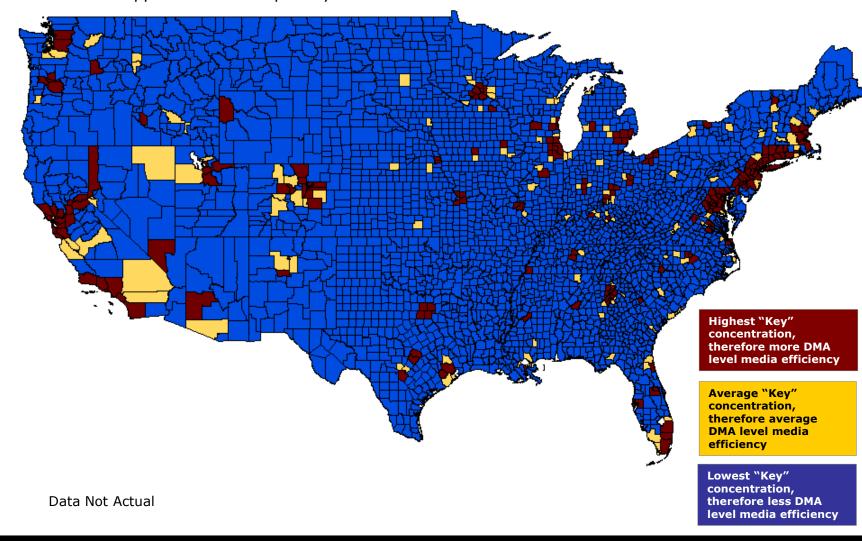

Presentation:

Summary

:Executiv

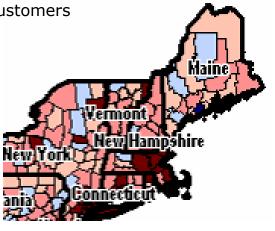

In this example, mass media is less efficient in those areas that are "blue." Media efficiencies are contained in very tight pockets. Local market promos/media activity should be much more efficient/effective than a "national layer" only. Use both national and local media if budgets allow, but focus on local opportunities as a priority.

Balancing Efficiency And Volumes...

\$100,000 spent to reach volumes without regard to "where" may result in 1,000 new customers

Opportunity Volumes

Target
Concentrations
& Conversion

\$100,000 spent to reach volumes in best quality markets may result in 2,000 new customers

Where you spend is just as important as how you spend

Sources: handshake Marketing, SMRB, Claritas

Low CPM Versus Target CPM

| CPM/Cost Per Order Comparison | Low CPM | Higher Targeted CPN | | | | |
|----------------------------------|---------------|------------------------|------------|--|--|--|
| СРМ | \$ 5 | \$ | 10 | | | |
| Budget | \$ 100,000 | \$ | 100,000 | | | |
| Overall Reach | 20,000,000 | | 10,000,000 | | | |
| Target Reach | 2,000,000 | | 3,000,000 | | | |
| Target CPM | \$ 50 | \$ | 33 | | | |
| Target Response Rate at 0.2% | 4,000 | | 6,000 | | | |
| Conversion at 30% | 1,200 | | 1,800 | | | |
| Cost Per Order | \$ 83 | \$ | 56 | | | |

For illustration only, costs and results will vary

- There is much debate regarding whether or not it is worth the cost to pay a premium (a higher cost per thousand/CPM) to reach target audiences.
- The higher CPM may end up actually costing less per (000) when measured against the target reached, and actually deliver higher levels of target reached and hence higher sales volumes... versus lower CPM options.

Cost Per Sale Versus Cost Per Piece

Based on 100k Hits To Home

| 24004 011 1001/11100 10 1101110 | | | | | | | | | | | | |
|--|----|------------------|----------|--|-------------------------|---------|--------|-------------------|--|--|--|--|
| Cost Per Sale and Volume Comparison, Higher Per Piece Expense | В | usiness <i>F</i> | As Usual | | handshake "Key" Targets | | | | | | | |
| Mailing | | 100,000 | | | 1 | 00,000 | | | | | | |
| Print/Mail/List | \$ | 40,000 | | | \$ | 52,000 | | | | | | |
| Starting Customer Acquisition Rate | | 0.50% | | | 0 | .50% | | | | | | |
| | C | ost Sale | Volume | | Cos | st Sale | Volume | Rate with Lift | | | | |
| Cost Per Sale/Volume (With No Lift) | \$ | 80 | 500 | | \$ | 104 | 500 | 0.50% | | | | |
| Cost Per Sale/Volume From 10% Lift | \$ | 80 | 500 | | \$ | 95 | 550 | 0.55% | | | | |
| Cost Per Sale/Volume From 20% Lift | \$ | 80 | 500 | | \$ | 87 | 600 | 0.60% | | | | |
| Cost Per Sale/Volume From 30% Lift | \$ | 80 | 500 | | \$ | 80 | 650 | 0.65% | | | | |
| Cost Per Sale/Volume From 40% Lift | \$ | 80 | 500 | | \$ | 74 | 700 | 0.70% | | | | |
| Cost Per Sale/Volume From 50% Lift | \$ | 80 | 500 | | \$ | 69 | 750 | 0.75% | | | | |
| Cost Per Sale/Volume From 60% Lift | \$ | 80 | 500 | | \$ | 65 | 800 | 0.80% | | | | |
| Cost Per Sale/Volume From 70% Lift | \$ | 80 | 500 | | \$ | 61 | 850 | 0.85% | | | | |
| Cost Per Sale/Volume From 80% Lift | \$ | 80 | 500 | | \$ | 58 | 900 | 0.90% | | | | |
| Cost Per Sale/Volume From 90% Lift | \$ | 80 | 500 | | \$ | 55 | 950 | 0.95% | | | | |
| Cost Per Sale/Volume From 100% Lift | \$ | 80 | 500 | | \$ | 52 | 1,000 | 1.00% | | | | |

For illustration only, costs and results will vary

- Cost per printed/mailed piece is not as important as total level of sales generated.
- Even with higher expense, the cost per sale will be lower with only modest improvement in order rates
 - handshake's average lift over non-handshake efforts over the last 13 years have ranged from a low of 42% to a high of 116%.

How To Go After Diversity Growth Opportunities...

When looking deeper into market situations, sub-target opportunities will emerge. In this example, each target is broken down by overall, diversity, men/women.

This type of tool is often used to determine what creative assets should be placed where (e.g., where to push competitive messages, how to circumvent the competition by targeting diversity)

| | Market | Overall 'Key" Target | | | | | | | African American "Key" Target | | | | | | |

Testimonial From User Of Optimization Deliverables

results

"Each time the all tactics application was delivered and learning applied, **I could count on 20-25% improvement in performance**, meaning if I spent \$100,000, I would only have to spend \$75,000 to get the same sales volume that would come from \$100k. More often than not, I just increased the spend to get to higher sales levels."

~ Corky Roth
