

# Manage Care With More Precision.

While other predictive data focuses on comparing populations zip code against zip code, CentraForce Health dives deeper, peeling back the layers that can show differences within the zip code.

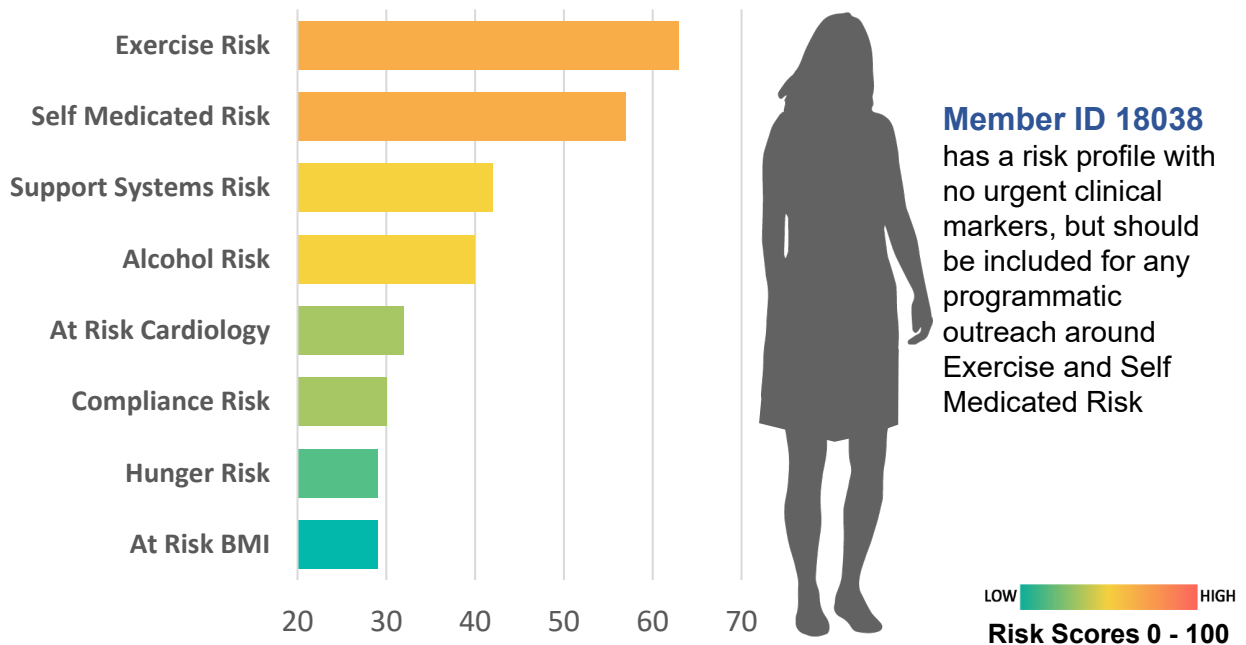

**Two members the same age and in the same zip code, with two totally different health outlooks.**

**Member ID 6413** requires urgent attention because of the preponderance of consequential risks.

If not addressed, there's a dangerous cocktail of risks that can worsen health and drive up cost of care.

- Preconditions
- Behavioral Health
- Excessive Facility and Specialist Utilizations

**Member ID 18038** has a risk profile with no urgent clinical markers, but should be included for any programmatic outreach around Exercise and Self Medicated Risk

LOW HIGH  
Risk Scores 0 - 100
